

Important information about Sybiz General Release version 6.00

This document lists issues, enhancements, functionality changes and other pertinent details relevant to the products in Sybiz General Release version 6.00. This document should be read in conjunction with the other documents published as part of Sybiz General Release version 6.00, in particular the change request PDFs.

Sybiz Vision 6.00

The following change requests have been addressed in the Sybiz Vision 6.00 General Release. Known hot spot areas such as bank reconciliation, transaction processing and various other areas have been fixed as part of the General Release.

Before you install Sybiz Vision 6.00 General Release at a customer's site we recommend that you test the areas you know will affect the customer.
