Barcodes in Sybiz Vision

Sybiz Vision is compliant with keyboard wedge type barcode scanners, and will allow users to scan a barcode and have it convert into a number in Sybiz Vision that the system recognises.

This can dramatically increase efficiencies within your organization, particularly if you have a lot of stock or have a high throughput of inventory.

Unlocking Sybiz Vision

Since Sybiz Vision 2.60 there has been a change in the way that unlock codes are produced.

We outline in this article what you need to watch out for as well as how to produce an unlock request to obtain an unlock code.

Christmas Break

The Support House will remain open over the Christmas break on all normal business days and business hours to ensure that any queries you have are responded to promptly.

As some staff will be taking a well earned rest with their families, it is imperative that your initial contact for any queries be 08 8377 3222. This will ensure that your call is answered and tracked correctly.

Any messages sent to mobile phones may not be responded to as quickly if that staff member is on annual leave.

Sybiz Vision automated reindex

Did you know that your system can be configured to reindex Sybiz Vision

Welcome to the Christmas Edition of TSH Brief.

We would like to thank everyone for your custom over the last year, and look forward to providing you with an even higher level of service in 2004 and beyond.

Please see the topic labelled "Christmas Break" for contacting us over the Christmas/ New Year period.

Management and Staff at The Support House wish you a Merry Christmas and a prosperous New Year. Above all stay safe, and we look forward to assisting you again in 2004!

Matthew Colliver

Unsubscribing

This email has been sent to you by The Support House Pty Ltd to provide you with useful information pertinent to your computer system.

automatically during the night or over weekends?

As long as you have some sort of schedule software (Windows 2000 and Windows XP operating systems have this as standard), ensure that all users are logged out of Sybiz Vision at the end of each day and can leave the machine on overnight, then we can setup the automatic reindex utility on your system.

For further information contact one of our consultants on 08 8377 3222 or click on the email link to send us an email.

End of Month Reports

There is a list of reports that should be printed as a bare minimum from Sybiz Vision prior to performing a New Period.

The list is a guide only and as it lists the bare minimum of reports to be printed, your own list will invariably be larger.

A good idea is to have a checklist of all the reports you need to print off prior to rollover and check them off each month as you produce them.
