Want to obtain a higher return from your Sybiz Investment?

Have you had new staff recently? If so, then if they have not had structured user training they may not be getting the most from your system.

Are your existing staff getting the most use possible from Sybiz Vision or Sybiz Vision Pay? Quite often, the training given when your system was first implemented covered in the main, only those areas of "Beginner" or "Intermediate" level. Harness the power of Sybiz Vision or Sybiz Vision Pay and be trained to the "Expert" level.

Find out about processes and procedures that help you get the most from your system and minimise your day to day running costs.

Keeping staff knowledge current and up to date ensures that you get the best return from your investment - your staff and Sybiz Vision or Sybiz Vision Pay.

Contact The Support House on 8377 3222 to talk to a consultant and identify training needs.

Sybiz Vision 3.00 Release

You should have received a letter from Sybiz Software with a CD ROM as well as a letter from The Support House relating to the upgrade to Sybiz Vision 3.00, Sybiz Vision Pay 4.00 and Vision Service Manager 2.00.

Please read the letter from Sybiz and the letter from The Support House and respond to any information requested as soon as possible. Once we have tested and gained feedback from this current release we will contact you regarding a suitable time for an upgrade.

If you have a need to upgrade immediately, then please contact The Support House on 08 8377 3222.

Vision Pay Accruals

Welcome to the April 2004 edition of TSH Brief.

Just as we are tooling up for the end of financial year, you to should be looking to the future. Revising end of year procedures, checking backup systems, reconciling general ledger and subsidiary accounts should now be on your task list.

Now is also the time to be looking at whether you are getting the most out of your general ledger reporting, and whether you should implement any new features that can be taken advantage of within Sybiz Vision.

Happy reading. As usual if you have any feedback, please [contact me](#).

This email has been sent to you by The Support House Pty

For anyone using Sybiz Vision Pay, the accruals tend to be the hardest to setup correctly. The main reason for this is that there are two areas to setup, and each area is fairly complex, particularly to the new user. This article will hopefully demystify the accrual process, and allow you to feel confident that the payroll system is calculating accruals correctly.

Are forms that are created by your company up to scratch?

Have you ever noticed that your feelings about a company are influenced by all forms of communication you have with that company. Have you ever looked at a document from a company and based your opinion of their level of professionalism on that document? Have you ever heard of the maxim "You never get a second chance to make a first impression?".

Now reverse that, and look at the documents that your company produce and send to your customers and suppliers. Are you portraying your business as you wish it to be portrayed?
